

Take your career to the next level

# Global Alliance for Chronic Diseases IMPLEMENTATION SCIENCE SCHOOL 2021

The GACD Implementation Science School is a one-of-a-kind opportunity for early- and mid-career researchers to build their **knowledge, skills, and confidence in the fields of implementation science and non-communicable diseases in low- and middle income countries**

7 days (up to 4 hours per day) between 29 November and 10 December 2021

Synchronous and asynchronous sessions, accommodating different time zones

Accessible entirely online

Through **expert-led lectures, small group sessions, facilitated group work, and panel discussions**, participants will learn how to study and implement research findings into policy and practice, select and apply theories, models, and frameworks, and create a professional network for future collaborations

**For more information and to apply**

# Global Alliance for Chronic Diseases IMPLEMENTATION SCIENCE SCHOOL 2021

*Up to 40 international participants will be selected through a competitive application process*

*The programme is being offered at no cost to participants*

Eligible applicants include people who:

Have completed or are undertaking postgraduate coursework or research related to health science or public health (or a related field)

**or**

Have recently completed a PhD relevant to implementation science

**or**

Are other relevant graduates with up to 5 years research experience

Preference will be given to:

- Applicants whose research or studies are connected with GACD projects or are focused on non-communicable diseases
- Applicants from low- and middle-income countries
- Early- and mid-career applicants undertaking their research within low- and middle-income countries or in vulnerable indigenous populations

*To ensure international diversity, participants from any one institution may be limited  
Attendees from previous GACD Implementation Science Schools will not be eligible for this event*

The Implementation Science School will comprise a series of synchronous and asynchronous sessions over two weeks to accommodate different time zones.

As a global training event, the programme will be delivered across multiple time zones and there is a possibility that plenary sessions will be either very early in the morning or late at night for some participants.

Selected participants are expected to demonstrate a commitment to this activity and attend all of the required sessions during the programme.
