

GACD Implementation Science e-Hub updates (May 2021, No. 1)

WHO Monograph is now available in Chinese

Have you checked the new version of the WHO monograph of “A guide to implementation research in the prevention and control of noncommunicable diseases” in Chinese? [Click here](#) to access the Monograph.

We also regularly update our curated library of implementation science publications, so keep checking back to the [e-Hub](#) for the latest research.

New case studies coming soon – could your project be one?

Very soon, we will be inviting researchers to partner with us to develop more case studies in implementation science. If you would like to nominate your project to be considered or would like more information when it becomes available, please contact Tina: contact-ehub@implementationscience-gacd.org

For some inspiration, see all our current case studies [here](#) or link straight to case studies on projects in [rural China](#), [Kenya](#), and [India](#).

The future is bright

We recently hosted the inaugural meeting of our [International Advisory Board](#), where we discussed innovations and new content for the e-Hub. We have lots of exciting developments in the pipeline – more updates coming soon!

If you have any feedback on how we can improve the e-Hub, we would love to hear from you. Please get in touch: feedback@implementationscience-gacd.org
